Advisory Board

- Tx Planning
- Periodontics
- Caries Charting
- Orthodontics
- Billing & Finance
- Telehealth
- Patient Manage
- Research
- Security: SOC 1
- Data Migration
- Implementation Framework
- Integration: Epic
Caries Charting Working Group Charge

• A Caries Classification Standard, written by the Caries Working Group, has been accepted by the Collaboration Advisory Board.

• In order to support caries research, a single method of entering the caries classification standard for use in all collaborating institutions is required.

• In order to improve oral health, caries classification needs to be placed in the context of a risk-based caries management framework, that needs to align with other components to promote overall health.
Organization: Emerging Working Groups

Advisory Board

- Grading
- Clinical Innovation
- Oral Pathology
- Training
- Future Technologies
- Patient Portal
- Tx Codes
Collaboration for Health IT

- Ongoing & Continuous Improvements: Implementation, Technology Expansion, Systems Integration, etc.
- Foundation Elements: System Architecture, Development Processes, Security, Legal Agreements
- Governance and Organization
- Goals
Collaboration having fun!
